---

### **Education**

**Full Stack Web Development Bootcamp** | Georgia Institute of Technology, Atlanta, GA

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, jQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS

Bachelor of Business Administration, **Accounting** | Georgia State University, Atlanta GA

Bachelor of Arts, **Psychology** | Georgia State University, Atlanta GA

### **Projects**

**Travellite** | Github: <https://github.com/usafowose/Project-1> | Link: <https://usafowose.github.io/Project-1/>

- Travellite is a simple travel app. Users will enter in a place they would like to visit, as well as their origin city, and are shown the cheapest flight prices, images, and upcoming weather of their destination
- Responsibility – Handled the accuweather.js file which pulls the weather information from the Accuweather API and uses DOM manipulation to append to the HTML page.
- Tools/Languages used: Materialize, Javascript, jQuery, HTML5, CSS, AJAX, Accuweather API, Pixabay API, travelpayouts API

**Bamazon** | Github: <https://github.com/illimitableissi/bamazon>

- Bamazon is an Amazon-like storefront created with MySQL. This back-end app will take in orders from customers and deplete stock from the store's inventory. Bamazon will also track product sales across the store's departments and then provide a summary of the highest-grossing departments in the store.
- Tools/Languages used: Node.js, MySQL, Inquirer NPM, jQuery, Javascript, Docker

**Save the Universe!** | Github: <https://github.com/illimitableissi/unit-4-game> | Link: <https://illimitableissi.github.io/unit-4-game/>

- The object of this game is to match the displayed number on the screen by clicking on the stones. Each stone has a different numerical value and they must add up to reach the target number.
- Tools/Languages used: HTML5, CSS, jQuery, Javascript

### **Additional Experience**

**Trimont Real Estate Advisors – Atlanta, GA**  
**Revenue Accountant**

Sep 2017 - Current

- Develop a thorough understanding of servicing agreements for a portfolio of clients
- Prepare abstract of each client's billing structure and payment method
- Use Excel software to calculate fees due each month and generate invoices in Microsoft GP
- Responsible for preparing and invoicing fees of \$700,000+ monthly across multiple assets
- Respond to billing inquiries from internal and external parties
- Provide information needed for monthly revenue accruals

**Cor-Tech** – Sandy Springs, GA

April 2016 – Sep 2017

**Financial Validation Analyst/Accountant**

- Prepared and reviewed general ledger transactions and journal entries
- Responsible for validating financial, accounting, and payroll data
- Responsible for preparing data using Excel (VLOOKUP's, HLOOKUP's, Pivot Tables, Macros)
- Analyzed data to determine discrepancies
- Conferred with other departments to determine the source of discrepancies and adjusted when necessary
- Created weekly finance reports
- Created, altered, and adjusted company invoices in QuickBooks
- Prepared and reviewed Accounts Receivable postings from the Client Remits to QuickBooks
- Worked with Centralized Team and Field Offices to collect outstanding invoices from clients
- Communicated effectively with centralized departments and clients
